

Your Athletes Fight For Wins. We Fight For Your Athletes.

HIGH-TRAFFIC FITNESS SPACES NEED HIGH-PERFORMANCE DISINFECTION

Athletic performance training facilities, health and wellness clubs, fitness centers, and recovery and rehabilitation rooms, including weight rooms and locker rooms, are breeding grounds for bacteria, viruses, and fungi, as well as odors. Maintaining a disinfected, odor-free environment is crucial to protecting the health and well-being of your athletes, members, and staff.

Want to elevate your cleaning protocols without elevating your costs and keep your athletes in the game?

The Genesis360™ Difference

- **Automated Operation**
Programmable misting cycles reduce manual effort and support repeatable operation.
- **Dry-Mist Technology**
Ultra-fine mist droplets help deliver broad coverage while reducing excess wetness, dripping, and pooling.
- **360-Degree Coverage**
Mist moves throughout the environment, helping reach around, under, behind, and across exposed areas.
- **Odor Control**
Genesis360 supports a fresher, cleaner, more welcoming environment for athletes, staff, and guests.
- **Reduced Labor**
Less manual spraying means less repetitive work, faster workflows, and better use of staff time.
- **Scalable Deployment**
The platform can support different spaces, layouts, room sizes, and operational needs.
- **Workflow Integration**
Genesis360 fits into daily routines, scheduled processes, and facility-wide operating procedures.
